Editor's Note

Dear Readers,

The second issue of the 37th years of the Thai Journal of Veterinary Medicine is finally coming out to the academic world. However, we are still celebrating for the commemoration of the 72nd anniversary of the Faculty of Veterinary Science, Chulalongkorn University throughout this year. We are again honoured to have Dr. Stanley Done's article on the second part of the control of swine respiratory diseases excluding *Mycoplasma hyoneumoniae*. His experience in the UK has been recognized worldwide. Our readers may utilize and apply this information in their practice. Last but not least, this issue contains 3 original papers, 1 short communication and the diagnostic forum. We would like to thank the editorial board and all

authors contributing their work in this issue. You all make it possible.

Again, there is no page charge or processing fee for the authors. We would like to encourage the authors from all over the world who work in the veterinary and animal sciences submitting their work to the TJVM. Your contribution will be acknowledged and referred by our readers in their future manuscripts. Our community will be stronger with the solid background of the knowledge that we share through the TJVM. Our editorial board is looking for a new manuscript from you.
